“PHCS is definitely a professional company to deal with. We have every confidence in PHCS and are reassured by the workmanship and credibility. Plus, they are nice people to do business with!”

As a result, Jim has helped out at various golf academies and in schools twice a week. Jim has also coached their grandson, Elliott, to a very high standard and Elliott has won many junior competitions.

Rosemary was a successful team dart player and also has trophies galore. They both take great pleasure in rambling in the open countryside.

DOORS OPENING AT THE RIGHT TIME

In May 1999, Jim and Rosemary visited some friends who had just purchased a park home on Three Arches Park. That was it! Jim was totally smitten, Rosemary a little apprehensive at first, but they put the maisonette on the market which sold immediately and within a month a park home became available at Three Arches Park. It was meant to be. By August 1999, Jim and Rosemary had moved in!

ABOVE: The Seagraves' equally attractive back garden attracts plenty of attention!

Jim and Rosemary instantly fell in love with the park's quiet atmosphere, with the 24 park homes scattered to create a sense of space while still affording a homely and comfortable environment.

They enthuse about their neighbours – everybody knows everybody else!

This offers a sense of security and reassurance, but everybody also respects each other's privacy.

What's more, the move has provided Jim and Rosemary financial freedom! The noose of a mortgage and the thought of paying it off up to their seventies has now been relinquished.

The site is a couple of miles from town, has a bus stop directly outside and is walking distance from East Surrey hospital. Opportunities to ramble are ample with common land and lakes nearby.

A HOME FOR LIFE

Jim and Rosemary's park home was only six years old when they bought it, but over the last 18 years they have stripped it out and upgraded it throughout. It is a beautiful two bedroom home with large Georgian bay windows to the front aspect. Gardening used to be a hobby but less so these days!

Jim has created a large tarmac drive for three cars to the side and they now have aromatic and colourful rose beds intermixed with pebbled areas. Recently Jim and Rosemary have installed a new heating system and changed the bathroom to a shower room. Jim was aware that changes made to the home can impact on the chassis and supporting structure on which the home sits. A neighbour, Mr Bowden, had previously used Park Home Chassis Services (PHCS) for the underside of his home and happily recommended the company. Jim did look at other companies but only felt reassured by and confident in PHCS.
